

Assignment 8: Equations

Part A:

How do you know it is an expression?

No equals sign

At $x=0$

$$.5(0) - 5$$

$$0-5$$

$$-5$$

At $x=10$

$$.5(10) - 5$$

$$5-5$$

$$0$$

Part B:

How do you know it is an equation?

Equals sign

$$0.5x - 5 = 0$$

$$0.5x = 5$$

$$x = 10$$

Part C:

Check for:

- Random values for a, b, c, and d
- A solved value for x
- Steps explained

Question 1:

What are you allowed to do to an equation?

- Simplify and solve
 - Anything as long as you do it to both sides of the equal sign
 - Use inverse order of operations
- a. Allowed
 - b. Not allowed
 - c. Not allowed

*check that reasoning is explained

Question 2:

$x/3 + 5.3 = -7.2$	given
$x/3 = -12.5$	Subtract 5.3 from both sides
$X = -37.5$	Multiply both sides by 3

Question 3:

$-6 = (5y-17) / (-3)$	given
$18 = 5y-17$	Multiply both sides by -3
$35 = 5y$	Add 17 to both sides
$y=7$	Divide both sides by 5
